PROFESSIONAL SUMMARY

Computer Science undergraduate at VIT-AP University specializing in full-stack web development with expertise in frontend, backend, and API integration. Proficient in Python, JavaScript, and React, with experience building and deploying scalable, user-focused applications. Completed internships at Scaler, working on reinforcement learning environments and training NPCs in system-level simulations. Demonstrates strong problem-solving ability through real-world projects, hackathons, and hands-on development.

EDUCATION

Vellore Institute of Technology

Bachelor of Technology in Computer Science and Engineering

Andhra Pradesh, India

2024 – 2028

TECHNICAL SKILLS

Languages: Java, Python, C/Cpp

Core Fundamentals: Data Structures & Algorithms, OOPs, DBMS,

Web/App Development: React.js, Next.js, Node.js, REST APIs

Databases: Firebase

Cloud & DevOps: Git, GitHub, CI/CD, Vercel

IoT & Hardware: Arduino, PCB Design (ICE-40)

Design & Tools: Figma, Canva

EXPERIENCE

AI Task Contributor / Project Associate

Scaler AI Labs – Dreamliner Project

Performed AI data annotation, validation, and quality assurance to support model training

Ensured adherence to task guidelines and quality benchmarks for accurate outputs

Improved data accuracy and consistency through iterative feedback and refinement

Game Engine & Development

Scaler AI Labs

Selected through a competitive evaluation process for Game Engine & Development track

Strengthened understanding of game development concepts and system design

Worked on reinforcement learning environments and NPC behaviour training

Gained hands-on experience in interactive systems and development workflows

Amaravati, India

Nov 2025 – Mar2026

Remote/Hybrid

Jan 2026 – Apr 2026

PROJECTS

CompanionX – Bus Ride-Sharing Platform (TypeScript\JavaScript\CSS\HTML)

[View Live]

- Engineered a web-based ride-sharing platform to **optimize bus travel costs** by matching users with co-travellers on shared routes using intelligent filtering.
- Designed and implemented a **route- and time-based matching system with dynamic fare splitting**, improving affordability and enhancing user travel efficiency.

LaundryHub – AI-Based Laundry Management System (React, TypeScript, Firebase, Tailwind CSS, Gemini AI)

[View Live]

Built a **full-stack laundry platform** with React, TypeScript, and Firebase featuring **QR-based tracking** and multi-role dashboards. Integrated **AI chatbot (Gemini)** and **real-time notifications** for seamless user experience and operations.

Ultimate Career AI – AI Career Recommendation Platform (JavaScript, Node.js, Firebase, Gemini AI, Chart.js)

[View [Live](#)]

- Built an AI-powered career assessment platform with personalized recommendations using Gemini AI.
- Implemented PDF report generation, email delivery, and analytics dashboards with Firebase and Chart.js.

ACHIEVEMENTS & CERTIFICATIONS

- Google Analytics Certification** – Earned **Google Analytics Certification**, demonstrating proficiency in **web analytics, user behavior tracking, and data-driven decision making**.
- Gen AI Exchange Hackathon 2025** – Google Cloud Worked on Ultimate Carrier AI- **AI Based advisor**.
- Tech Sprint Hackathon** – Google Developer Groups worked on **Laundry Management** based on real world problems.

LANGUAGES

Fluent: English, Hindi, Telugu
